when a filter-input condenser lamecessary to use more plate-supping shown to limit the peak plate curi	rger than 40 µf is used, it may b ly impedance than the minimum valu rent to the rated value.	•
Type of input coupling used shou in the grid circuit, with fixed b 0.25 megohm; with cathode bias, 1.	ld not introduce too much resistanc ias, the resistance should not excee .0 megohm.	đ
